

*THE CITY OF AUSTIN GROW ZONE PROGRAM:
RESTORING ECOLOGICAL FUNCTION AND
PRESERVING VALUABLE ASSETS IN CITY PARKS*

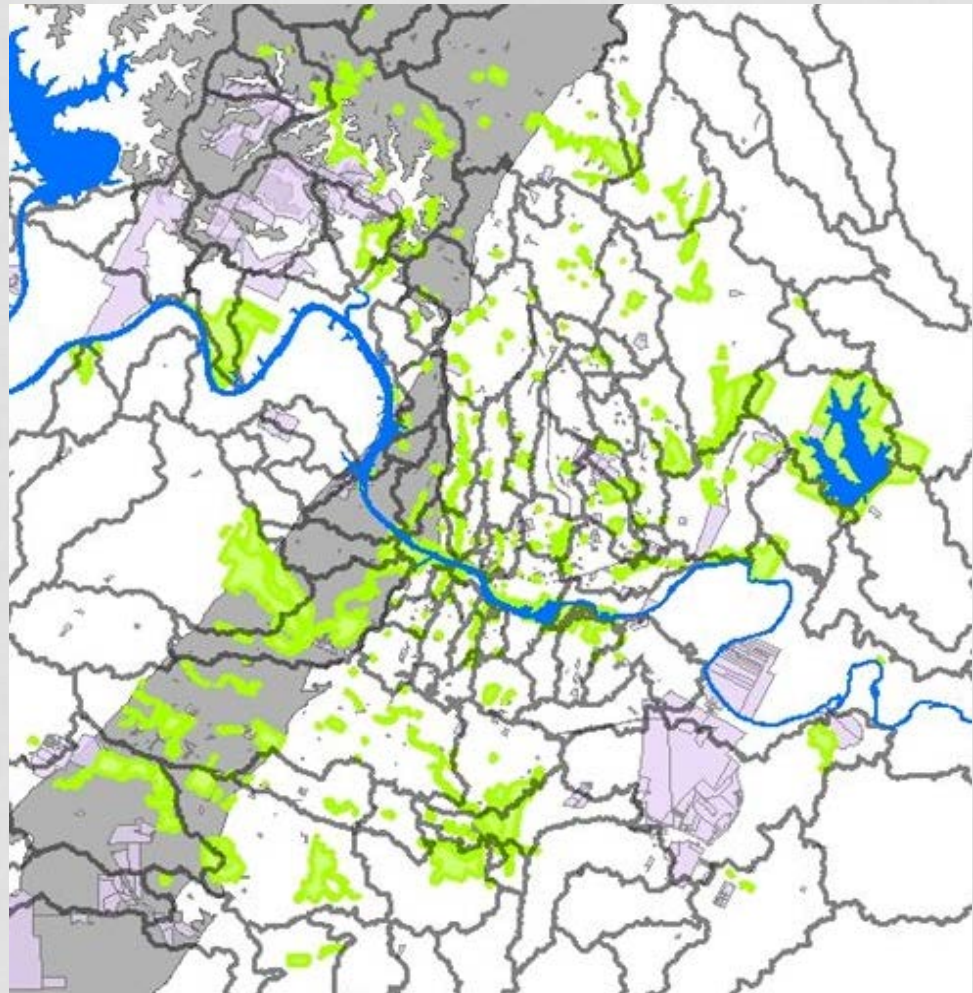

JOHN CLEMENT
WATERSHED PROTECTION DEPARTMENT
CITY OF AUSTIN

THE CITY OF AUSTIN GROW ZONE PROGRAM

Riparian areas as assets

- Most municipal land is in City parks
- Most municipal **riparian** land is in City parks
- Austin –
 - 260 parks
 - 20,000 acres

THE CITY OF AUSTIN GROW ZONE PROGRAM

Land Management vs Asset Management

- Park managers and planners are important stakeholders
 - Water quality protection and ecosystem services are low priorities for these groups
- What challenges do parks systems face that can be addressed through riparian management?
 - How can we help park managers and planners protect and enhance their assets?

THE CITY OF AUSTIN GROW ZONE PROGRAM

Erosion issues

- Creeks
- Shoreline
- Threat to assets

THE CITY OF AUSTIN GROW ZONE PROGRAM

Stormwater issues

- Localized flooding
- Trail washout
- Gullies
- Poor drainage

THE CITY OF AUSTIN GROW ZONE PROGRAM

Non-contact Recreation

- Does it look like a healthy, natural channel?
- Odors
- Algae
- Turbidity

Contact Recreation

- Are you ok with people getting in the water?

THE CITY OF AUSTIN GROW ZONE PROGRAM

Mowing

- Direct costs associated with mowing
- Emissions

THE CITY OF AUSTIN GROW ZONE PROGRAM

Riparian Zone Issues - Urban Stream Syndrome

- Flashier hydrograph
- Elevated concentrations of nutrients and contaminants
- Altered channel morphology
- Compromised bank stability
- Nonpoint source pollution
- Disconnected floodplains

THE CITY OF AUSTIN GROW ZONE PROGRAM

The solution – ecological restoration with minimal management

- Create No Mow Zones (eliminate main disturbance)
- Seed with herbaceous native plant mixes
- Selective invasive species control
- Plant native woody seedlings
- Soil erosion control as needed
- Soil amendments as needed

Future Creekside Forest

Grow Zone

(No Mowing!)

The City of Austin is working to **restore the native forests** that used to flourish beside creeks by creating "grow zones" in city parks. *This area was designated as a "grow zone" in 2012 and it will take several years for seedlings to become large trees.* Volunteers, birds and squirrels are taking care of the planting – the City of Austin won't hamper this natural process by mowing.

Benefits of a creekside forest:

- Improves the natural and beneficial functions of the floodplain
- Prevents stream bank erosion
- Filters storm runoff, removing pollutants before they reach the creek
- Provides habitat and food for a diverse group of animals
- Provides shade that cools air and water temperatures
- Creates a greenbelt forest with diverse tree and plant communities for outdoor enthusiasts
- Reduces the City's carbon footprint
- Reduces maintenance so park staff can focus on other park projects

Mowed

First Year of Growth

5 to 10 Years

THE CITY OF AUSTIN GROW ZONE PROGRAM

How – Outreach, education and volunteer mobilization

- Organize volunteer workdays
- Develop educational materials
- Educate staff
- Talk to local stakeholders
- Perform creek walks
- Post informational signs

THE CITY OF AUSTIN GROW ZONE PROGRAM

Benefits beyond water quality and erosion control

- Healthy and calming natural spaces
- Shade for recreation
- Promotes diversity and stewardship
- Education
- Contributes to carbon neutrality

THE CITY OF AUSTIN GROW ZONE PROGRAM

Original MOU (2012) – 19 parks
Addendum (2014) – 12 more parks
Other (flood buyouts, etc) – 7 areas

- **158 acres** of recovering riparian area
- **13 miles** of streams and shoreline with GZ on one or both sides

THE CITY OF AUSTIN GROW ZONE PROGRAM

How the City of Austin supports volunteer efforts –

- Developing techniques appropriate for volunteers – safe, simple tools that have minimal adverse impacts
- Developing planning templates and assessment measures – so citizens can implement and evaluate their own projects
- Providing restoration materials – seeds, seedlings, erosion control fabric, mulch
- Providing expert advice

Grow Zone Restoration Plan

Site Name			
Creek Name			
Watershed Name			
Volunteer Contact	Name _____	Phone: _____	Email: _____
Associated Volunteer Group(s)	<input type="checkbox"/> Keep Austin Beautiful <input type="checkbox"/> None <input type="checkbox"/> Austin Parks Foundation <input type="checkbox"/> Other: _____		
Moisture and Canopy	Check which of the four conditions are present at the site:	<input type="checkbox"/> upland/open <input type="checkbox"/> upland/closed canopy	<input type="checkbox"/> floodplain/open <input type="checkbox"/> floodplain/closed canopy
Check which invasives are present at the site:			
Invasives	<input type="checkbox"/> woody	<input type="checkbox"/> bamboo/cane	<input type="checkbox"/> johnsongrass
List the dominant invasives on the site:			
Identify other important aspects of the site:			
<input type="checkbox"/> There are opportunities for native seeding <input type="checkbox"/> There are opportunities for tree seedling planting <input type="checkbox"/> Vegetation is poor along banks or other erosion-prone areas <input type="checkbox"/> Ragweed is dominant on the site <input type="checkbox"/> There are other dominant invasive species on the site (such as vines) <input type="checkbox"/> There may be a need for haul-off of plant material after events <input type="checkbox"/> There are footpaths in sensitive areas <input type="checkbox"/> There are creek access points or crossings affecting the banks <input type="checkbox"/> There is significant woody debris in or near the channel <input type="checkbox"/> There are potential "tree islands" on site <input type="checkbox"/> There are opportunities for green stormwater methods (berms, swales, etc)			

THE CITY OF AUSTIN GROW ZONE PROGRAM

Keep Austin Beautiful

- More than 50 Adopt-A-Creek groups
- Over 30 miles of stream adopted

Austin Parks Foundation

- Organizes training events and has large pool of volunteers – 98 events for 2014 It's My Park Day

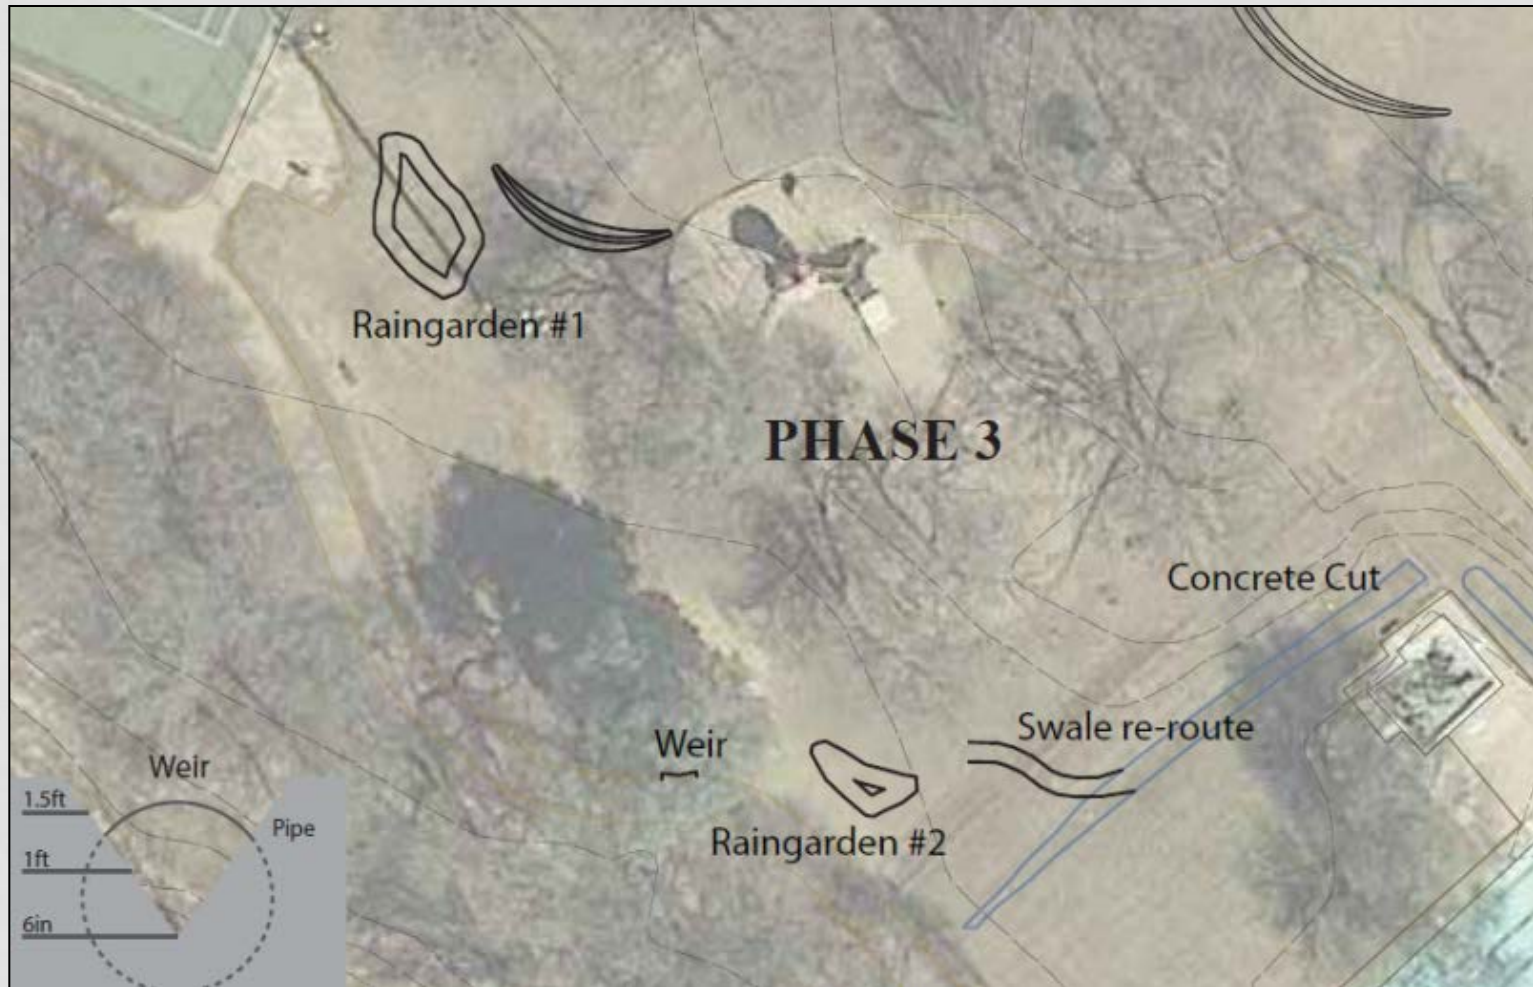

TreeFolks

- Helps us plant 9,000 seedlings per year in City parks

Additional Recommendations -

- Start small
- Start early on education and outreach
- Get to know your stakeholders – for and against
- Level of service
 - How much time and effort should go to management?
 - Framework for
 - Deciding on management actions
 - Responding to stakeholder requests
- Metrics – how do you measure success?
 - Inventory – stream length, number, acres
 - How well are they functioning?
 - Are they impacting other uses? Creating issues?
